

irriDate: Team Information

September 28, 2024

Naser Alkuhili: I'm from Jeddah, Saudi Arabia, and I'm currently pursuing both my Bachelor's and Master's degrees in Artificial Intelligence concurrently at the Illinois Institute of Technology in Chicago, USA. For this project, I worked on the React Native Expo application, managed the backend code, and developed AI models for both the smart irrigation and palm disease analysis features.

Dev Mistry: He is from India and is pursuing a Master's degree in Artificial Intelligence at Illinois Institute of Technology in Chicago. His contributions include working on the hardware aspect of the project and assisting with the development of the "Plant Health" AI model.
